OVEN THERMOSTAT REPLACEMENT INSTRUCTIONS

BECAUSE OF A CHANGE IN SUPPLIER, THE PARTS INCLUDED IN THIS KIT ARE DIFFERENT TO THOSE FITTED ON YOUR CURRENT UNIT.

To replace thermostat, proceed as follows:

1. Remove oven thermostat as detailed in Section 3.7 of installation and servicing instructions.
2. Remove RH oven door and RH outer side panel.
3. Remove burner feed pipe.
4. Connect replacement thermostat to float rail.
5. Secure phial to clips on RH side panel.
6. Connect replacement pipe between thermostat and burner using nuts and olives provided.
7. Reconnect thermocouple to thermostat.
8. Replace RH oven door and RH outer side panel.
9. Fit replacement control knob.
10. The thermostat is supplied with a natural gas bypass screw. If unit operates using propane gas then alternative bypass screw supplied with kit should be fitted.
11. Check gas tightness and oven thermostat performance as detailed in Section 2.5 of installation and servicing instructions

11.	Sealing washer	1

All Gas Appliances

Replacement Pipes in Flexible Form

It is now the policy of Falcon Foodservice Equipment to issue flexible piping, along with appropriate fittings, as a spare to replace rigid piping..

Fixing is as before, with the exception that the tubing should be bent into shape while ensuring that the bellows are not bent too much.

We apologise for any inconvenience this may cause.
