16027065

Description: Motor Kit Dependable Care

Repair Part Number: 12002351, 12002352, 12002353, 12002752

Kit includes:

Plug Connector Motor Harness		
	Motor	16027065 Instruction Sheet

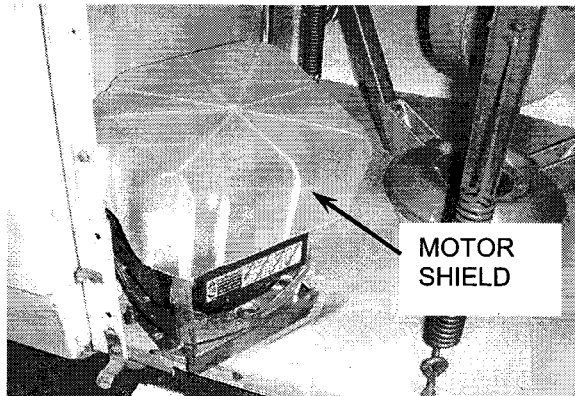

WARNING

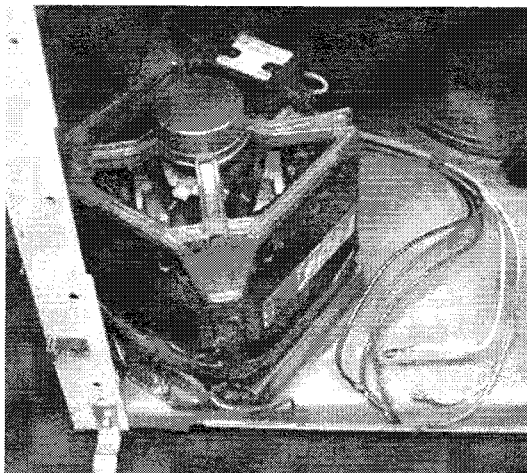

To avoid risk of electrical shock, personal injury or death; disconnect electrical power before servicing.

Procedure:

1. Remove the motor shield above the motor.

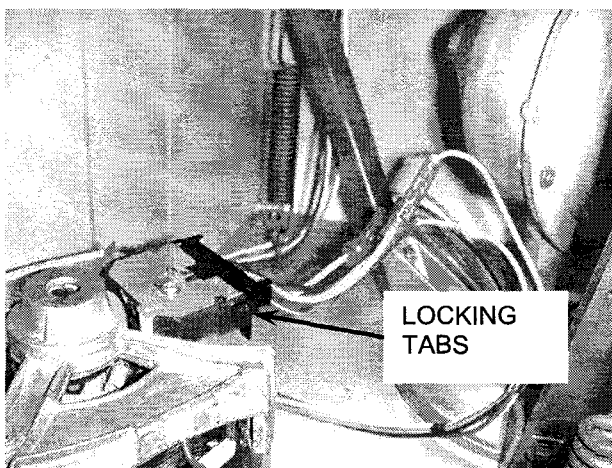

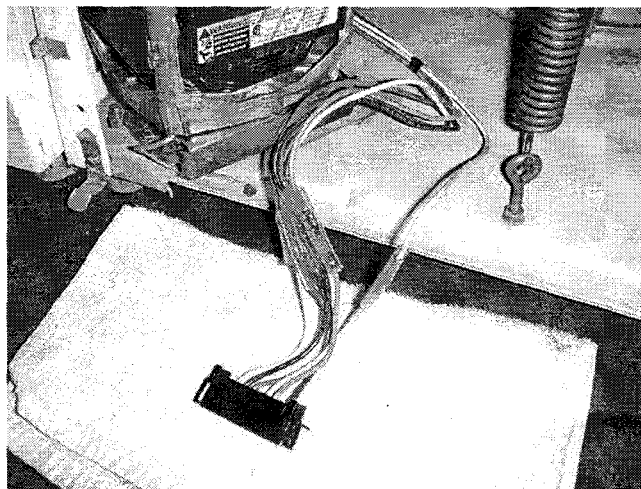

2. Disconnect the wires to the original motor.

3. Remove the motor and motor carriage from the washer base frame.
4. Transfer the motor carriage and motor pulley to the replacement motor and install the replacement motor carriage assembly onto the washer base frame.
5. Connect the jumper harness in the kit to the main wire harness of the washer.

Note: on one speed motor replacements; disregard the two extra remaining wires. These extra wires are for the two speed motors only.

6. Connect the connector of the harness to the motor. Be sure the connector is fully inserted onto the motor and the two locking tabs of the connector are fully engaged onto the switch housing.

7. Pull the extra length of harness back through the rear wire retainer on the base frame toward the left rear corner of the cabinet. This will keep the excess harness away from the damper area and springs.
8. Reinstall the motor shield above the motor. Motor replacement repair now completed.
