## **INSTRUCTIONS FOR CHANGING TOASTER ELEMENTS**

### **ELEMENT SET FOR BREAD TOASTERS**

2 SLICE  
4 SLICE  
6 SLICE

### **REQUIRED TOOLS**

1 x No. 2 Pozzi/Phillips Screwdriver  
1 x Slotted Screwdriver  
1 x Pair of Long Nose Pliers

### **REMOVING OLD ELEMENTS**

- 1) Disconnect electrical supply.
- 2) Remove crumb tray
- 3) Turn the machine upside down and remove base plate
- 4) Loosen screws on element retaining strip and slide strip back
- 5) Remove nuts and screws from connecting links
- 6) Remove old elements

### **FITTING NEW ELEMENTS**

Reverse the procedure detailed above and ensure that the two elements marked '4T-168 or 4T-204' are at each end of the toaster, and the elements marked '4T-167 or 4T-201' are in the middle.

It is important to ensure that the element retaining strip is slid back into place and secured, otherwise an electrical short circuit may result from the elements "Dropping" and touching the base.

*If in doubt of the sequence of element links please refer to the wiring diagram overleaf or call our TECHNICAL HELPLINE on +44 (0)01372 450855*
